Research Interest

I am interested in building reliable multimodal intelligent systems that can understand, interact with, and collaborate effectively with people in real-world environments.

Human-Centered AI • Multimodal & Interactive Intelligence • Trustworthy AI

Selected Publications

4 first-author papers 1 co-first-author paper 2 Q1 journal papers 2 ICORE A venues 1 best-paper nomination

1 Digital Harf: A Clinically Integrated Multimodal AI System for Pervasive Arabic Speech and Language Therapy May 2026

Asif Azad, Mohammad Sadat Hossain, MD Sadik Hossain Shanto, Sabri Boughorbel, Abdulrhman Aljouie, Bdour Alwuqaysi, Yahya Bokhari, Ayah Othman Sindi, Ehsan Hoque

Targeting CHI 2027 | [Paper Link](#) | [Project Link](#)

Built a **clinically integrated multimodal AI platform** for home-based Arabic speech and language assessment and intervention. Its **agentic synthetic-data engine** generated culturally grounded therapeutic content with **90.1% clinician acceptance**; the platform is being evaluated in an **ongoing randomized clinical trial**.

2 Harf-Speech: A Clinically Aligned Framework for Arabic Phoneme-Level Speech Assessment Sep 2026

Asif Azad, MD Sadik Hossain Shanto, Mohammad Sadat Hossain, Bdour Alwuqaysi, Sabri Boughorbel, Yahya Bokhari, Abdulrhman Aljouie, Ayah Othman Sindi, Ehsan Hoque

Interspeech 2026 | ICORE A | Accepted; proceedings forthcoming | [Paper Link](#)

Developed a modular, **clinically aligned Arabic pronunciation-assessment framework** combining speech-to-phoneme modeling with interpretable alignment-based scoring. It achieved an **8.92% phoneme error rate** and **strong agreement with speech-language pathologists** ($r = 0.791$), enabling scalable assessment for an underserved language.

3 The Art of Saying ‘Maybe’: A Conformal Lens for Uncertainty Benchmarking in VLMs Mar 2026

Asif Azad, Mohammad Sadat Hossain, MD Sadik Hossain Shanto, M Saifur Rahman, Md Rizwan Parvez

Findings of EACL 2026 | EACL: ICORE A | Published | [Paper Link](#)

Established a **comprehensive conformal uncertainty benchmark** of **18 open- and closed-source VLMs across six multimodal datasets and three scoring functions**, including likelihood proxies for API-only models. The study shows that stronger models generally quantify uncertainty better, while uncertainty estimation remains **particularly challenging on mathematical and reasoning-intensive tasks**.

4 Beyond Accuracy: Enhancing Parkinson’s Diagnosis with Uncertainty Quantification of Machine Learning Models Aug 2025

Asif Azad, Md. Saiful Islam, Ehsan Hoque, M. Saifur Rahman

AIiH 2025, Springer LNCS | Published | **Best Paper Award Nomination** | [Paper Link](#) | [Code](#)

Evaluated **Monte Carlo Dropout (MCD), Deep Evidential Classification (DEC), and Bayesian Neural Networks (BNNs)** across motor, facial, and speech datasets for Parkinson’s diagnosis. The study found **MCD and BNNs more reliable than DEC** and showed how uncertainty estimates can **flag ambiguous predictions** to support safer clinical decision-making.

5 PULSAR: Graph-Based Positive Unlabeled Learning with Multi-Stream Adaptive Convolutions for Parkinson’s Disease Recognition Apr 2026

Md Zarif Ul Alam, Asif Azad*, Md Saiful Islam, Ehsan Hoque, M Saifur Rahman* *Equal contribution

ACM Transactions on Computing for Healthcare | Q1; Impact Factor 8.0 | Published | [Paper Link](#)

Co-developed **PULSAR, a positive-unlabeled multi-stream graph-convolutional framework** for Parkinson’s screening from webcam finger-tapping videos. By modeling noisy self-reported labels and joint, bone, velocity, and acceleration streams, it achieved **71.3% mean accuracy on an independent test set** despite limited reliable labels.

6 Validation of Remote Multimodal AI Screening for Parkinson Disease Across Diverse Settings May 2026
Md Saiful Islam, Tariq Adnan, Abdelrahman Abdelkader, Zipei Liu, Evelyn Ma, Sooyong Park, **Asif Azad**, Pai Liu, Meghan Pawlik, Emily Hartman, Erin Shelton, Kristina B. Larson, M. Saifur Rahman, Cathe Schwartz, Karen Jaffe, Jamie L. Adams, Ruth B. Schneider, Jan Freyberg, E. Ray Dorsey, Ehsan Hoque
Communications Medicine | Q1; Impact Factor 7.4 | Published | [Paper Link](#)
Validated PARK, an uncertainty-aware multimodal screening system across 1,865 participants in supervised and at-home settings, achieving 0.85–0.87 AUROC. *Contribution*: Collaborated with the first author to design and implement the paper’s visualizations and contributed to UFNet’s uncertainty-quantification analysis.

Education

Bangladesh University of Engineering and Technology (BUET) Feb 2020 – Mar 2025
B.Sc. in Computer Science and Engineering
CGPA: 3.91/4.00 | Top 10% | Dean’s List: three consecutive years
Undergraduate thesis: *Beyond Accuracy: Enhancing Parkinson’s Diagnosis with Uncertainty Quantification of Machine Learning Models*
Supervisor: Prof. M Saifur Rahman | Best Paper Award nominee, AI in Healthcare Conference (AliH) 2025

Experience

AI Research Engineer, AI Innovation Hub, Ministry of Defence Health Services Apr 2025 – Present
Saudi Arabia

- Co-develop **Digital Harf**, a multimodal AI platform for Arabic speech and language assessment and intervention, with clinical teams across MODHS medical centers.
- Co-designed the platform’s randomized clinical trial, including the study protocol, IRB and SFDA approvals, and therapist training; coordinate the ongoing clinical evaluation.
- Conduct research from Digital Harf, including **Harf-Speech** (Interspeech 2026), which develops and evaluates an Arabic phoneme-level pronunciation assessment method against speech-language pathologists’ ratings.

Adjunct Lecturer, Bangladesh University of Engineering and Technology Nov 2025 – May 2026
Dhaka, Bangladesh

- Taught Data Structures & Algorithms, Database Systems, and Digital Logic Design; designed labs and sessional materials connecting theory with practice.
- Designed assessments and provided academic guidance and mentorship to students.

Awards, Honors & Recognition

2025 **Featured Profile**, *The Daily Star Campus*, recognized for AI-in-healthcare work at Saudi Arabia’s Ministry of Defence

2025 **Best Paper Award Nomination**, AI in Healthcare Conference (AliH)

2024 **Silver Award**, Blockchain Olympiad Bangladesh 2024 | Hyperledger Fabric, Solidity

2023 **IEEE Richard E. Merwin Student Scholarship**, sole Fall 2023 recipient from Bangladesh

2023 **Champion**, Deep Learning Sprint 2023 | Computer Vision, Transformer, Finetuning

2023 **Champion**, DataVerse Challenge - ITVerse 2023 | Natural Language Processing

2022 **Country First**, IEEE Xtreme 16.0 | Competitive Programming

2022–24 **Dean’s List Student Award**, BUET; three consecutive years

Leadership

- **Lead Student Coordinator, BUET CSE Festival 2024**: Led multi-month coordination, secured sponsorships, and aligned faculty and student teams to deliver an inter-university Deep Learning Sprint, hackathon, CTF cybersecurity competition, game jam, ICPC-style programming contest, and poster presentation, alongside cultural, indoor/outdoor, and faculty–student programs.
- **Basketball Team Captain, BUET University and Hall Teams (2024)**: Captained both teams; led the hall team to the Inter-Hall championship as the tournament’s top scorer.

Service

- **Reviewer, ACL Rolling Review (2025):** Reviewed research submissions in the October cycle, contributing peer-review service to the computational linguistics community.
- **Invited Speaker & Session Co-Chair (2025):** Presented *AI in Medicine: Transforming Healthcare Today & Tomorrow* and co-chaired the *Power of AI in Medical Science* session at the 52nd Annual National Conference of the Ophthalmological Society of Bangladesh.
- **Workshop Speaker, University of Dhaka (2025):** Conducted *Python for Scientific Research* for the MRS Student Society, introducing students across disciplines to programming and scientific computing.

Mentoring

- **Mentor & Judge, Solvio AI Hackathon (2025):** Guided 5 of 20 finalist teams through technical and product feedback during a 24-hour final; 3 earned first runner-up, second runner-up, and honorable-mention finishes among 538 competing teams.
- **IEEE Video and Image Processing Cup Mentor (2025):** Mentored 7 BUET CSE undergraduate students on Team BUET Pixelated, which earned a Special Mention in the global competition.
- **Competitive Programming Instructor (2021):** Taught foundational algorithms, data structures, and contest problem solving at BUET's beginner coding camp.
- **Undergraduate Mentoring, BUET:** Mentored BUET CSE undergraduates during my tenure as an Adjunct Lecturer, holding dedicated one-on-one conversations on career planning and academic choices.
